Profile

Why do I like Programming?

Creating systems means evolving, and I like to be part of the evolution, give something to the world.

That's why I'm trying to get involved in projects that implicate developing programs with the purpose of practicing and continuing to learn new technologies.

Career

"Ingeniero en Desarrollo de Software" at Universidad TecMilenio Ciuda Juárez
Title

Courses

FreeCodeCamp:

- HTML and CSS
- Responsive Desing with Bootstrap
- JQuery
- JavaScript
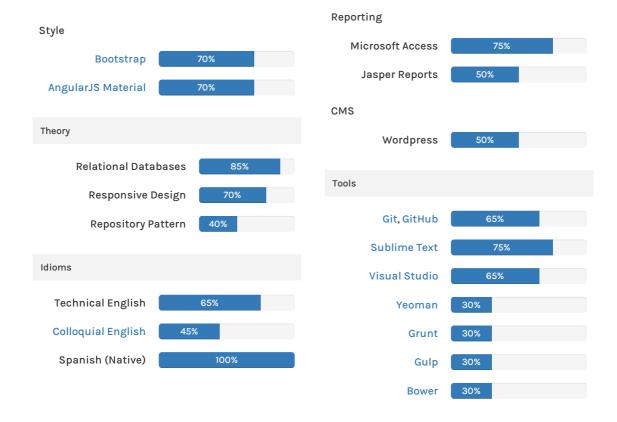

CodeCademy

- Learn Git
- Learn AngularJS
- Learn JavaScript

About me

At the moment I am a front-end software developer at AngularJS and working on the Ionic and Angular 4 update, although I am still learning about this part, I am also studying a back-end ServiceStack framework.

I think that in this business it is very important to keep updated, for that reason I try to invest time and practice, that's when the need arises for other areas to automate your data processes, such as saving and extracting information for your business decisions.

On the other hand, it is important for me to spend time with my family, especially quality time that helps their formation, where at the end of the day they are left with a good memory or life experience.
